MPB60tbA - Drive & Control Upgrade Kit For 57,15mm (2.25 in.) traversing boring bars

Technology based on over 100 years of machining experience™

Unlock the next generation rotational drive and feed control for your existing Boring bar fleet.

Have you locked yourself in to one vendor with big investments in Machining accessories?
Upgrade where it matters.

Use your existing 57,15mm (2.25 in.) bar and all machining accessories with the new powerful servo motor Rotational Feed Unit from Metalock Machines. Comes with a modern Wired Control Unit with a 4 in. graphical display and membrane keyboard.

Kit contains:

- MPB60tb Rotational Feed Unit
- 57,15mm (2.25 in.) bar conversion kit
- Control Unit
- Transportation and storage box
